Submit

In backend, Admin will be able to set default language for site. Please find screenshot below:

Select Default Language	English ⦿ Italian ○

Note: If **Spanish or Italian** is selected as a default language then Spanish content is displayed on the website.

Front end:-

In front end there will be dropdown menu for selecting different languages for translation, and all the labels will be updated as per the selected language. Please find screenshot below:
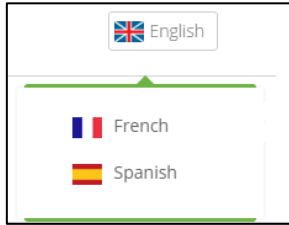

In front end, if language option is changed only the Labels and CMS pages content is changed to display the content entered by the Admin Users for that language.

Type 2

In addition to Type 1 features, the website will have following features:

Front end User:-

Front end users will be able to submit content in different languages. Please find screenshot below:

Note: In front end, users will be able to submit details in multiple-languages, as seen above the user can submit the listing data in English and Arabic.

In front end there will be dropdown menu for selecting different languages for translation, and all the labels will be updated as per the selected language. Please find below screenshot:

In front end, if language option is changed only the Labels and CMS pages content is changed to display the content entered by the Admin Users for that language.

Type 3

In addition to Type 1 and 2 features, the website will have following features:

Admin Interface:-
Admin can change the labels of Admin Interface changed to multiple languages. And they get Language Switch option in Admin Interface also.

Example: English Language Selected in admin

Example: Spanish Language Selected in admin

Type 4

In type 4, we will integrate Google Translator on website. Please find screenshot below:
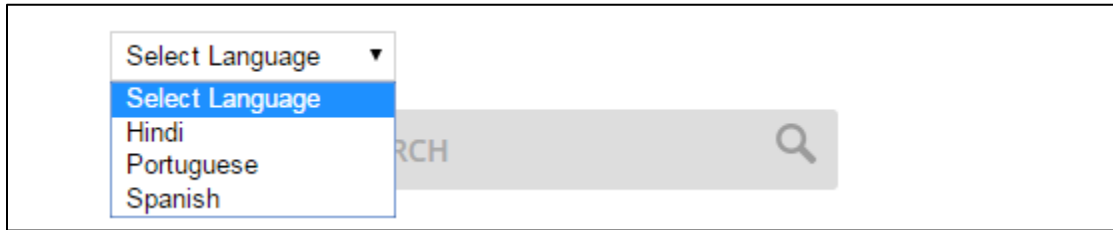

In Google Translator we can specify list of languages to display in **Select Language** drop down. It translate the whole webpage in the selected language.

Google translate is free service that is easy to use.

Note: Google Translate is not 100% accurate, but it is most cost effective option and user friendly also when your website visitors are very diverse and they may want to use your website in languages other than the language options available.
